

"Word of Mouth" Update

Child & Adolescent Oral Health Service July – August 2019

From Monday, 22 July, two new Mobile dental units will start visiting communities throughout the MidCentral area to bring dental services to children and adolescents who are most in need.

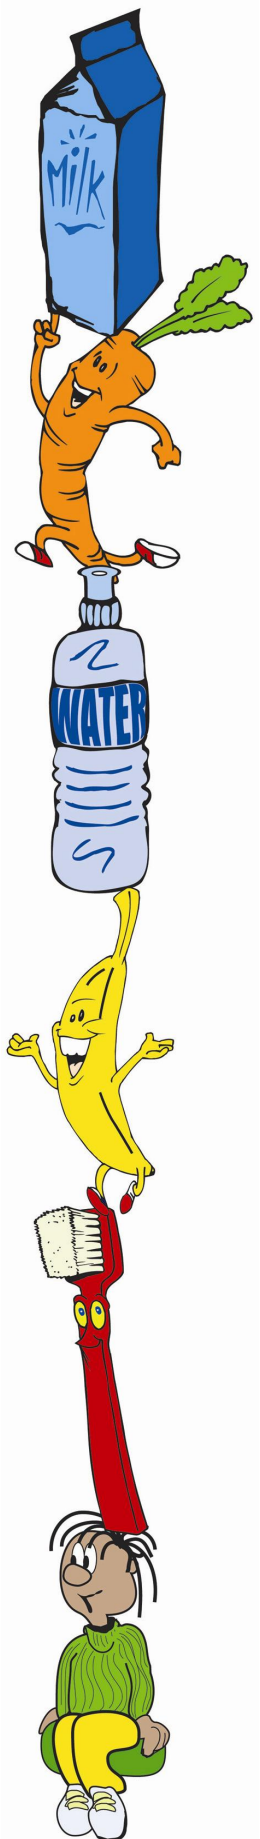

The new units, we'll be able to provide better access and equity across our populations. Unfortunately we still see children with abscesses and lots of holes in their teeth, which is demoralising, so to be able to increase our accessibility to these children is something we're very much looking forward to.

The two units were blessed on Friday, 19 July, and will be on the region's road from this week onwards.
