Neonatal B.C.G. should be offered to infants at increased risk of tuberculosis defined as those who:

- Will be living in a house, or with family/whanau, or a person with either current Tuberculosis or a past history of Tuberculosis. Yes No
- Have parents or household members (who lived within the last five years for a period of six or more months or longer) in countries where there is a high incidence of Tuberculosis. * Yes No
- During their first five years of life, will be living for three months or longer in a high incidence country. * Yes No

* All countries listed over page.

If one or more boxes are marked YES, this baby is at high risk of being exposed to Tuberculosis. The B.C.G. vaccination is therefore recommended for this baby.

Public Health Services will determine if a child is eligible for vaccination and will organise.
